

BURAK AY

Software Engineer | Full-Stack Developer (.NET & Java)

Istanbul, Turkey | burakay.work@gmail.com | 0545 419 54 81

GitHub: github.com/Burakaynm

PROFESSIONAL SUMMARY

Computer Engineering graduate with professional experience in full-stack software development. Currently working as a Software Engineer at RDC Partner, developing enterprise-level applications using .NET Core, React, TypeScript, and SQL Server, as well as backend development with Java and Spring Boot. Strong background in backend development, RESTful APIs, database-driven systems, and modern frontend architectures, with hands-on experience using AI-assisted coding tools (Claude Code, Cursor, GitHub Copilot) to accelerate development and improve code quality.

TECHNICAL SKILLS

Programming Languages: C#, Java, JavaScript, TypeScript, SQL

Backend & Frameworks: .NET Core, ASP.NET, Java, Spring / Spring Boot, Node.js, Express.js

Frontend: React, HTML5, CSS3, Pixi.js, GSAP

Databases: SQL Server, MySQL, MongoDB

Tools & Platforms: Git, JWT, Docker, Unity

AI-Assisted Development: Claude Code, Cursor, GitHub Copilot

PROFESSIONAL EXPERIENCE

Software Engineer – RDC Partner (Sep 2024 – Present)

- Develop and maintain full-stack enterprise applications using .NET Core, React, and TypeScript.
- Design and implement RESTful APIs and backend business logic.
- Work with SQL Server on database design, queries, and performance optimization.
- Build reusable and modular React components.
- Develop backend features in Java and Spring Boot alongside the existing .NET stack, contributing to service-side functionality.
- Use AI-assisted development tools (Claude Code, Cursor, GitHub Copilot) as part of the daily workflow to speed up implementation, testing, and debugging.
- Collaborate with cross-functional teams and participate in code reviews.

Software Development Intern – 3Pounds (Sep 2023 – Jun 2024)

- Developed multiple Unity-based game projects using C#.
- Implemented gameplay mechanics, AI behaviors, and animations.
- Improved debugging, optimization, and project management skills.

PROJECTS

Words of Wonders – Web Game (Technologies: JavaScript, Pixi.js, GSAP)

- Developed an interactive word puzzle game with modular architecture.
- Implemented animations, inactivity timers, and automated word completion.

To-Do Application (Full-Stack) (Technologies: React, Node.js, Express.js, MongoDB, JWT)

- Designed and developed a full-stack task management system.
- Implemented authentication, CRUD operations, filtering, and pagination.

Additional Projects – Game Development (Technologies: Unity, C#, Python, OpenCV)

- Developed multiple Unity-based games including top-down shooter and fantasy genres.
- Implemented AI-driven enemies, pathfinding, combat systems, and procedural generation.
- Created a computer vision-based hand tracking game using OpenCV and Python.

EDUCATION

Bachelor of Engineering in Computer Engineering (2020 – 2025)

Istanbul University–Cerrahpaşa

Graduation Project: Hand Tracking Game using OpenCV and Unity
